ARM Ltd ENVIRONMENT POLICY

ARM Ltd of Rugeley Staffordshire are involved in the design, construction, consultancy and maintenance of water treatment related systems including wetland technology.

ARM Ltd, while providing an environmentally friendly service will continuously strive to reduce the impact of its operations on the environment and will comply with all applicable legislation.

The management team are committed to Environmental Improvement and have allocated specific responsibility for the implementation, maintenance and improving on these performances to a specific individual.

We will identify any changes in legislation applicable to our organisation and the works in which we are involved, evaluating current compliance and where we are not compliant will initiate actions to become compliant.

We will identify the Environmental Aspects of our business, identifying the associated impacts, ranking them in order of significance. We will identify measurable Objectives and Targets for reducing our significant Impacts, reducing these Impacts through Management Programmes to ensure our objectives and targets are achieved.

We will provide suitable Training and Awareness to our employees and any sub contractors under our control to ensure that our targets and Operational controls are followed and pollution incidents are prevented.

We will monitor our environmental performance in meeting Objectives and Targets, against any consents or regulatory requirements, taking Corrective Action where applicable to redress any Non Conformances.

ARM will identify any potential emergency situations and take all preparations to prevent the occurrence of such emergencies, periodically testing and evaluating these preventative measures to ensure they are effective.

Should we have a pollution incident, emergency situation or problem then we will ensure these are reported to the appropriate authority and that actions are taken to prevent re occurrence of the incident.

We will audit our system and procedures to identify any weaknesses and implement Corrective Actions to eliminate the cause of any weaknesses.

Any records created by means of our Environmental Management System, to demonstrate legal compliance, etc., will be filed to allow easy retrieval whenever these records are to be referenced.

We will develop and implement systems and procedures to manage our system, updating these in a controlled manner to ensure we are all working in unison.
